Firestone Diamonds Limited Announces Sale of Exceptional Record Breaking 215 Carat White Gem Diamond

Firestone Diamonds Limited is pleased to announce the sale of a significant natural diamond recovered from its Liqhobong Diamond Mine in the highlands of Lesotho. The exceptional 215 carat white makeable diamond represents a record breaking recovery for Liqhobong as it is the largest diamond of its quality recovered from the mine to date. The diamond is currently on sale through a competitive bidding tender process with viewings in Antwerp and Dubai.

As a responsible natural diamond producer, with production sourced entirely from Liqhobong Mine, Firestone Diamonds is dedicated to upholding stringent Environmental, Social, and Governance (ESG) standards, ensuring responsible and sustainable practices at Liqhobong Mine. The unveiling of this exceptional diamond underscores our commitment to excellence and ethical sourcing of natural diamonds. This sale represents another milestone in our ongoing efforts to deliver value to stakeholders while maintaining the highest industry standards.

This diamond is another shining example of the calibre of diamonds sourced from the Mountain Kingdom of Lesotho.
